B

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-13, drawn to method of forming a pellet, classified in class 264, subclass 109+.**
- II. Claims 14-26, drawn to an apparatus for mixing a composition, classified in class 366, subclass 139.**

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case apparatus as claimed does not comprise a pelletizing means which is required for performing the method of the group I claims. The apparatus as claim can be used to mix compositions other than that recited in the Group I method claims.

Art Unit: 1732

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied

by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
